Character Thought System Design Document

Version 0.1

1. DESIGN PHILOSOPHY

The game never shows traditional hints.

The player never sees:

- "Press X"
- "Choose option 1"
- "Available actions"

Instead, the player sees:

Character Thoughts

Character thoughts represent:

- experience;
- intuition;
- education;
- fear;
- knowledge;
- personality.

The interface supports immersion rather than replacing imagination.

2. THOUGHT TYPES

The game contains two primary categories of thoughts.

CONSCIOUS THOUGHTS

Things the character logically understands.

Examples:

- "Perhaps I can negotiate."
 - "This man appears frightened."
 - "I should draw my weapon."
 - "I may attempt to flee."
-

INTUITIVE THOUGHTS

Things the character feels instinctively.

Examples:

- "Something feels wrong."
 - "This place is dangerous."
 - "I think someone is watching me."
 - "This person is hiding something."
-

3. THOUGHT DISPLAY

Example:

Bandit: "Your money or your life."

Thoughts:

• Perhaps I can negotiate. • He seems nervous. • I may attempt to intimidate him. • I should observe his weapon.

The player remains free to type anything.

4. THOUGHT GENERATION

Thoughts depend on:

- intelligence;
 - wisdom;
 - experience;
 - training;
 - reputation;
 - injuries;
 - fear;
 - environment;
 - current situation.
-

5. BEGINNER CHARACTER

Example:

Thoughts:

- Talk. • Attack. • Observe. • Escape.

The character has limited experience.

6. TRAINED CHARACTER

Example:

Thoughts:

- Analyze enemy stance. • Attempt negotiation. • Search for weakness. • Prepare weapon.
-

7. MASTER CHARACTER

Example:

Thoughts:

- His left leg is injured.
 - He favors his right hand.
 - A defensive stance may work.
 - A feint could create an opening.
-

8. COMBAT THOUGHTS

Examples:

Novice:

- Attack.
 - Defend.
 - Retreat.
-

Experienced:

- Attack left arm.
 - Attack right arm.
 - Attempt disarm.
 - Observe movement.
-

Master:

- Attack head.
 - Perform feint.
 - Counterattack.
 - Break defense.
 - Target injury.
-

9. SOCIAL THOUGHTS

Examples:

- Attempt persuasion.
 - Attempt intimidation.
 - Attempt deception.
 - Offer a bribe.
 - Change the subject.
 - Ask for information.
-

10. EXPLORATION THOUGHTS

Examples:

- Search the room.
 - Examine footprints.
 - Listen carefully.
 - Look for hidden mechanisms.
 - Search for traps.
-

11. FEAR EFFECTS

Fear changes thoughts.

Example:

Normal:

- Attack. • Negotiate. • Observe.

Terrified:

- Run. • Hide. • Surrender. • Pray.
-

12. INJURY EFFECTS

Example:

Broken leg:

- Retreat. • Seek treatment. • Avoid combat.

Broken arm:

- Defend. • Escape. • Use remaining hand.
-

13. DISEASE EFFECTS

Example:

High fever:

- Rest. • Find medicine. • Continue carefully.
-

14. MAGIC THOUGHTS

Mage example:

- Detect magical aura. • Analyze spell. • Counter magic. • Channel mana.
-

15. HUNTER THOUGHTS

Hunter example:

- Observe tracks.
 - Estimate distance.
 - Search for ambush.
 - Analyze terrain.
-

16. TEACHER DISCOVERY

Thoughts may reveal opportunities.

Example:

- This warrior appears highly trained.
 - He might teach swordsmanship.
 - His equipment suggests military experience.
-

17. HIDDEN KNOWLEDGE

Some thoughts only appear when:

- the player has enough experience;
 - the player learned specific skills;
 - the player possesses relevant knowledge.
-

18. AI GENERATION

AI may create contextual thoughts.

Example:

Situation: Dark forest.

AI thought:

- The silence here feels unnatural.
-

19. THOUGHT SETTINGS

Players may choose:

Mode 1: Full Thoughts

Mode 2: Intuition Only

Mode 3: Combat Only

Mode 4: No Thoughts (Hardcore)

20. CORE RULE

Thoughts must never restrict the player.

Thoughts exist to inspire actions, not to define them.

The player may always attempt anything.
