## NPC\_MEMORY\_SYSTEM.md

### NPC Memory and Relationship System

Version 0.1

---

## 1. DESIGN PHILOSOPHY

NPCs are not chatbots.

NPCs are people.

Every NPC:

- remembers;
- forgets;
- changes opinions;
- forms relationships;
- develops fears;
- creates stories.

Memory creates personality.

---

## 2. MEMORY CATEGORIES

Every NPC possesses several types of memory.

---

### Personal Memory

Memories directly involving the NPC.

Examples:

- conversations;
- insults;
- gifts;
- promises;

- threats;
  - combat encounters.
- 

## **Social Memory**

Memories received from others.

Examples:

- rumors;
  - stories;
  - warnings;
  - gossip.
- 

## **Professional Memory**

Memories related to occupation.

Examples:

- customers;
  - apprentices;
  - patients;
  - contracts.
- 

## **Emotional Memory**

Events that created strong emotions.

Examples:

- fear;
  - gratitude;
  - betrayal;
  - love;
  - humiliation.
- 

## **Historical Memory**

Major events.

Examples:

- wars;
  - disasters;
  - rulers;
  - famous heroes.
- 

### 3. MEMORY STRUCTURE

Each memory contains:

- event;
- date;
- location;
- participants;
- emotional impact;
- confidence;
- importance;
- source.

Example:

Event: "The player saved my daughter."

Emotion: Gratitude.

Importance: 95/100.

Confidence: 100%.

---

### 4. MEMORY IMPORTANCE

Importance levels:

0-20 Minor memory.

21-50 Normal memory.

51-80 Important memory.

81-100 Life-changing memory.

---

## 5. MEMORY DURATION

Minor memories:

- days;
- weeks.

Normal memories:

- months.

Important memories:

- years.

Life-changing memories:

- entire lifetime.
- 

## 6. FORGETTING

NPCs forget naturally.

Factors:

- age;
- intelligence;
- trauma;
- repetition;
- importance.

Example:

"Traveler bought bread."

Forgotten after weeks.

Example:

"Traveler killed my brother."

Never forgotten.

---

## 7. EMOTIONAL IMPACT

Every event changes emotions.

Examples:

Save NPC:

- gratitude.

Rob NPC:

- anger.

Lie successfully:

- distrust.

Keep promise:

- respect.
- 

## 8. RELATIONSHIP SCALE

Relationship values:

-100 Mortal enemy.

-75 Enemy.

-50 Disliked.

0 Neutral.

50 Friendly.

75 Trusted.

100 Family.

Players never see numbers.

---

## 9. TRUST

Trust changes through actions.

Examples:

Keep promise:

- trust.

Break promise:

- trust.

Save life: major trust increase.

Betray: massive trust loss.

---

## 10. FEAR

NPCs may fear the player.

Sources:

- violence;
- reputation;
- appearance;
- magic;
- rumors.

Effects:

- avoidance;
  - obedience;
  - hostility;
  - panic.
- 

## 11. RESPECT

NPCs respect:

- strength;

- intelligence;
- honor;
- reputation;
- wealth.

Different NPCs respect different things.

---

## 12. HATRED

Hatred may become permanent.

Examples:

- murder;
- betrayal;
- torture;
- humiliation.

Hatred can spread to:

- family;
  - friends;
  - factions.
- 

## 13. GRATITUDE

Gratitude creates:

- discounts;
  - friendship;
  - loyalty;
  - protection.
- 

## 14. LOVE

NPCs may develop:

- attraction;
- affection;
- devotion.

Conditions:

- personality compatibility;
  - history;
  - trust.
- 

## 15. TRAUMA

Traumatic memories alter behavior.

Examples:

Bandit attacked.

Result:

- fear of roads;
  - nightmares;
  - aggression.
- 

## 16. MEMORY SHARING

NPCs share memories.

Methods:

- conversation;
  - rumors;
  - letters;
  - witnesses;
  - stories.
- 

## 17. FALSE MEMORIES

NPCs may remember incorrectly.

Examples:

Reality:

Player stole 10 gold.

Memory:

Player stole everything.

---

## 18. FAMILY MEMORY

Families share memories.

Example:

Player kills father.

Children remember.

Grandchildren may know the story.

---

## 19. FACTION MEMORY

Organizations remember.

Examples:

- crimes;
  - heroism;
  - betrayal;
  - loyalty.
- 

## 20. NPC OPINIONS

NPCs form opinions.

Examples:

"He is brave."

"He is dangerous."

"He is a liar."

"He saved me."

Opinions influence behavior.

---

## 21. PLAYER PROMISES

NPCs remember promises.

Examples:

"I will return."

"I will help you."

"I will repay my debt."

Broken promises have consequences.

---

## 22. MEMORY TRIGGERS

Memories may reactivate.

Examples:

- locations;
  - music;
  - faces;
  - objects;
  - names.
- 

## 23. OBSERVATION MEMORY

NPCs remember what they see.

Examples:

- combat style;
- injuries;
- clothing;
- companions.

---

## 24. REPUTATION INTEGRATION

Memory influences:

- rumors;
- trust;
- prices;
- quests;
- teaching.

---

## 25. AI MEMORY PROCESS

Before responding, AI checks:

1. Who is speaking?
2. Do I remember them?
3. What emotions do I associate?
4. Has my opinion changed?
5. What happened recently?
6. What rumors have I heard?

---

## 26. MEMORY DECAY EXCEPTIONS

Never forgotten:

- family deaths;
- betrayal;
- love;
- humiliation;
- life-saving events.

---

## 27. LEGACY MEMORY

After NPC death:

- family remembers;
- friends remember;
- factions remember;

- history may remember.
- 

## **28. CORE RULE**

NPCs do not remember facts.

NPCs remember experiences.

And experiences change people.
