

AI-DND

ADDENDUM — INJURY, POISON AND DISEASE SYSTEM

Version 0.1

1. DESIGN PHILOSOPHY

Combat consequences must persist.

A battle is not:

- win;
- lose;
- heal instantly.

A battle creates consequences.

Examples:

- scars;
 - broken bones;
 - infections;
 - poison;
 - trauma;
 - disabilities.
-

2. BODY PART SYSTEM

Every character has independent body zones.

- Head
- Torso
- Left Arm
- Right Arm
- Left Leg
- Right Leg

Each body part has:

- health;

- injuries;
 - bleeding;
 - fractures;
 - infections;
 - pain.
-

3. HEAD INJURIES

Possible effects:

Minor:

- dizziness.

Moderate:

- concentration penalties.

Severe:

- hallucinations;
- memory loss;
- unconsciousness.

Critical:

- death.
-

4. ARM INJURIES

Possible effects:

Minor:

- reduced accuracy.

Moderate:

- slower attacks.

Severe:

- unable to use weapon.

Critical:

- permanent disability.
-

5. LEG INJURIES

Possible effects:

Minor:

- slower travel.

Moderate:

- limping.

Severe:

- unable to run.

Critical:

- crawling only.
-

6. TORSO INJURIES

Possible effects:

Minor:

- pain.

Moderate:

- reduced stamina.

Severe:

- bleeding.

Critical:

- death.
-

7. BLEEDING

Bleeding severity:

- light;
- medium;
- severe;
- fatal.

Effects:

- HP loss;
- weakness;
- unconsciousness;
- death.

Treatment:

- bandages;
 - medicine;
 - healers;
 - magic.
-

8. FRACTURES

Possible fractures:

- arm;
- leg;
- ribs;
- skull.

Effects:

- combat penalties;
- movement penalties;
- permanent consequences.

Healing:

- days;
 - weeks;
 - months.
-

9. PAIN SYSTEM

Pain levels:

No Pain ↓ Discomfort ↓ Pain ↓ Severe Pain ↓ Agony

Effects:

- accuracy penalties;
 - slower actions;
 - fear;
 - panic;
 - unconsciousness.
-

10. POISON SYSTEM

Poison types:

- weak poison;
- hunting poison;
- assassin poison;
- paralytic poison;
- magical poison.

Possible effects:

- health loss;
 - paralysis;
 - blindness;
 - hallucinations;
 - weakness;
 - death.
-

11. DISEASE SYSTEM

Diseases exist permanently in the world.

Examples:

- fever;
- plague;
- lung infection;

- swamp rot;
 - blood parasites;
 - magical corruption.
-

12. INFECTION SYSTEM

Untreated wounds may become infected.

Symptoms:

- fever;
- weakness;
- pain;
- delirium.

Treatment:

- medicine;
 - herbs;
 - healers;
 - magic.
-

13. MENTAL CONDITIONS

Characters may suffer:

- fear;
- panic;
- trauma;
- nightmares;
- madness.

Examples:

After dragon encounter:

- fear of dragons.

After torture:

- PTSD.

After magical corruption:

- hallucinations.
-

14. SCARS

Major injuries create scars.

Scars affect:

- appearance;
- reputation;
- dialogue.

Example:

NPC:

"You survived a troll attack? I recognize those scars."

15. PERMANENT INJURIES

Some injuries never fully heal.

Examples:

- lost eye;
- broken arm;
- damaged leg;
- crippled hand.

Players may learn to adapt.

16. PLAYER INFORMATION

The player never sees:

"Left Leg HP = 32"

Instead:

Healthy ↓ Bruised ↓ Injured ↓ Seriously Injured ↓ Crippled

17. AI DESCRIPTION

AI describes injuries naturally.

Example:

Instead of:

-20 HP.

AI says:

"The sword cuts deep into your thigh. Your leg trembles, and every step becomes painful."

18. CORE RULE

Every injury must tell a story.

Combat should create memories, not just reduce numbers.
