MEDICINE_AND_HEALING_SYSTEM.md

Version 0.1

1. DESIGN PHILOSOPHY

Healing is not instant.

Healing requires:

- time;
- resources;
- knowledge;
- people.

The player must prepare for danger.

2. HEALTH STATES

Characters exist in one of several states.

Perfect Health ↓ Minor Injuries ↓ Moderate Injuries ↓ Serious Injuries ↓ Critical Condition ↓ Death

3. TREATMENT TIERS

There are four levels of treatment.

SELF TREATMENT

The player may:

- apply bandages;
- drink medicine;
- stop bleeding;
- disinfect wounds;

- use herbs.

Limitations:

- cannot repair fractures;
 - cannot perform surgery;
 - cannot cure severe diseases.
-

FIELD TREATMENT

Performed by:

- companions;
- soldiers;
- hunters.

Examples:

- splints;
- sutures;
- temporary medicine.

Purpose:

Keep the patient alive.

PROFESSIONAL TREATMENT

Performed by:

- healers;
- physicians;
- surgeons;
- herbalists.

Examples:

- bone repair;
 - surgery;
 - poison treatment;
 - disease treatment.
-

MAGICAL TREATMENT

Performed by:

- priests;
- shamans;
- mages.

Examples:

- magical cleansing;
- curse removal;
- spiritual healing.

Limitations:

- expensive;
 - dangerous;
 - rare.
-

4. HEALER TYPES

Village Herbalist

Can treat:

- wounds;
- infections;
- minor diseases;
- poisons.

Cannot treat:

- fractures;
 - magical corruption.
-

Military Surgeon

Can treat:

- fractures;
- amputations;

- severe injuries.

Cannot treat:

- magical diseases.
-

Priest

Can treat:

- curses;
- spiritual damage;
- fear;
- madness.

Cannot treat:

- physical trauma.
-

Mage Physician

Can treat:

- magical corruption;
 - mana poisoning;
 - magical wounds.
-

Traveling Doctor

Can perform:

- emergency treatment;
- diagnosis;
- surgery.

Expensive.

5. DIAGNOSIS

The player does not always know what is wrong.

Example:

Player status:

- weakness;
- fever;
- dizziness.

The player must ask:

"I need someone to examine me."

The healer determines:

- poison;
 - infection;
 - disease;
 - curse.
-

6. POISONS

Poisons have stages.

Example:

Snake Poison:

Stage 1:

- pain.

Stage 2:

- weakness.

Stage 3:

- paralysis.

Stage 4:

- death.
-

7. DISEASES

Examples:

Swamp Fever

Symptoms:

- weakness;
 - hallucinations;
 - nightmares.
-

Black Lung

Symptoms:

- coughing;
 - exhaustion;
 - breathing difficulty.
-

Blood Rot

Symptoms:

- fever;
 - skin damage;
 - internal bleeding.
-

Mana Corruption

Symptoms:

- magical instability;
 - insanity;
 - mutations.
-

8. RECOVERY

Recovery requires:

- food;
- rest;
- medicine;
- treatment.

Recovery speed depends on:

- constitution;
 - treatment quality;
 - environment;
 - diseases.
-

9. HOSPITALS

Major cities contain:

- hospitals;
- temples;
- surgeons;
- laboratories.

Services:

- diagnosis;
 - surgery;
 - recovery.
-

10. CAMPING

The player may create camps.

Camp actions:

- sleep;
- eat;
- heal;
- cook;
- craft.

Sleeping while injured may:

- improve;
 - worsen;
 - infect wounds.
-

11. COMPANIONS

Companions may learn:

- medicine;
- surgery;
- herbalism.

A good companion can save the player's life.

12. DEATH ALTERNATIVES

Losing combat does not always mean death.

Possible outcomes:

- unconsciousness;
 - robbery;
 - imprisonment;
 - rescue;
 - slavery;
 - severe injury;
 - permanent disability.
-

13. SCARS

Major injuries create scars.

Examples:

- facial scar;
- burned skin;
- missing eye;
- damaged hand.

NPCs may react.

14. MENTAL TRAUMA

Possible effects:

- fear;
- nightmares;
- panic;
- depression;
- paranoia.

Treatment:

- priests;
 - healers;
 - time.
-

15. SURGERY

Some injuries require surgery.

Examples:

- broken bones;
- internal bleeding;
- arrow removal;
- infected wounds.

Surgery may:

- succeed;
 - fail;
 - kill the patient.
-

16. CORE RULE

Survival is not about health points.

Survival is about preparation, knowledge, relationships, and consequences.
